

LIST OF TABLES

| Table No. | Title | Page No. |
|-----------|---|----------|
| I | Training program adopted for throughout 12 weeks by experimental groups | 85 |
| II | Exercises adopted by experimental groups | 86 |
| III | Prescription of schedule for experimental groups | 87 |
| IV | Computation of analysis of covariance of the data on the leg explosive power (vertical jump) of pre-test, post test and adjusted post test scores of high intensity, medium intensity low intensity and control groups | 91 |
| V | The Scheffee's test for the difference between paired means of leg explosive power (vertical jump). | 93 |
| VI | Computation of analysis of covariance of the data on the leg explosive power (horizontal) standing broad jump of pre-test, post test and adjusted post test scores of high intensity, medium intensity low intensity and control groups | 96 |
| VII | The Scheffee's test for the difference between paired means of leg explosive power (horizontal) standing broad jump | 98 |
| VIII | Computation of analysis of covariance of the data on the volley ball spiking ability of pre-test, post test and adjusted post test scores of high intensity, medium intensity low intensity and control groups | 101 |
| IX | the Scheffee's test for the difference between paired means of volley ball spiking ability | 103 |
| X | Computation of analysis of covariance of the data on the volley ball jump serving ability of pre-test, post test and adjusted post test scores of high intensity, medium intensity low intensity and control groups | 106 |
| XI | The Scheffee's test for the difference between paired means of volley ball jump serving ability. | 108 |
