

LIST OF TABLES

Table		Page
I	Test selection	65
II	Intra class correlation co-efficient of test - retest scores	66
III	Table showing the selected variables and tests administered	88
IV	Significance of mean gains & losses between pre and post test scores on selected psychomotor variables of SAQ training without mental rehearsal	112
V	Significance of mean gains & losses between pre and post test scores on selected psychomotor variables of SAQ training with mental rehearsal	113
VI	Significance of mean gains & losses between pre and post test scores on selected psychomotor variables of control group (CG)	114
VII	Computation of analysis of covariance on speed among experimental and control groups of women basketball players	116
VIII	The scheffe's test for the differences between the adjusted post test means on speed	118
IX	Computation of analysis of covariance on agility among experimental and control groups of women basketball players	121
X	The scheffe's test for the differences between the adjusted post test means on agility	123
XI	Computation of analysis of covariance on balance among experimental and control groups of women basketball players	126
XII	The scheffe's test for the differences between the adjusted post test means on balance	128
XIII	Computation of analysis of covariance on explosive power among experimental and control groups of women basketball players	131
XIV	The scheffe's test for the differences between the adjusted post test means on explosive power	133

Table	LIST OF TABLES (Continued)	Page
XV	Computation of analysis of covariance on differentiation ability among experimental and control groups of women basketball players	136
XVI	The scheffe's test for the differences between the adjusted post test means on differentiation ability	138
XVII	Computation of analysis of covariance on orientation ability among experimental and control groups of women basketball players	141
XVIII	The scheffe's test for the differences between the adjusted post test means on orientation ability	143
XIX	Computation of analysis of covariance on reaction ability among experimental and control groups of women basketball players	146
XX	The scheffe's test for the differences between the adjusted post test means on reaction ability	148
XXI	Computation of analysis of covariance on eye hand coordination among experimental and control groups of women basketball players	151
XXII	The scheffe's test for the differences between the adjusted post test means on eye hand coordination	153
XXIII	Significance of mean gains & losses between pre and post test scores on selected psychological variables of SAQ training without mental rehearsal	156
XXIV	Significance of mean gains & losses between pre and post test scores on selected psychological variables of SAQ training with mental rehearsal	157
XXV	Significance of mean gains & losses between pre and post test scores on selected psychological variables of control group (CG)	158
XXVI	Computation of analysis of covariance on locus of control among experimental and control groups of women basketball players	159

Table	LIST OF TABLES (Continued)	Page
XXVII	The scheffe's test for the differences between the adjusted post test means on locus of control	161
XXVIII	Computation of analysis of covariance on imagery among experimental and control groups of women basketball players	164
XXIX	The scheffe's test for the differences between the adjusted post test means on eye imagery	166
XXX	Significance of mean gains & losses between pre and post test scores on selected game skills variables of SAQ training without mental rehearsal	169
XXXI	Significance of mean gains & losses between pre and post test scores on selected game skill variables of SAQ training with mental rehearsal	170
XXXII	Significance of mean gains & losses between pre and post test scores on selected game skill variables of control group (CG)	171
XXXIII	Computation of analysis of covariance on passing among experimental and control groups of women basketball players	172
XXXIV	The scheffe's test for the differences between the adjusted post test means on Passing	174
XXXV	Computation of analysis of covariance on dribbling among experimental and control groups of women basketball players	177
XXXVI	The scheffe's test for the differences between the adjusted post test means on dribbling	179
XXXVII	Computation of analysis of covariance on shooting among experimental and control groups of women basketball players	182
XXXVIII	The scheffe's test for the differences between the adjusted post test means on shooting	184
